CORE SKILLS

Generative & Agentic AI

LLMs, RAG, Agentic AI, LangGraph, LangChain, LLM Fine-Tuning, Prompt Engineering, Contextual Chunking, Knowledge Graphs, SPARQL, Vector Databases, Multimodal AI, NLP/NLU

AI / ML Frameworks

PyTorch, TensorFlow, scikit-learn, Keras, Hugging Face Transformers

Cloud & Engineering

AWS (Bedrock, S3, Lambda, SageMaker), Docker, REST APIs (Flask), CI/CD, Git, Agile/Scrum

Data & Analytics

Python, SQL, SAS, Alteryx, PostgreSQL, ETL Pipelines, Feature Engineering, Statistical Analysis

Visualization & BI

Power BI, Tableau, Google Analytics, Streamlit, Mixpanel, Excel (Advanced), Retool

MD ZEESHAN RAZA

ML & Agentic AI Engineer

ML and Agentic AI Engineer with 3 years of experience building production-grade Generative AI systems - agentic workflows, RAG pipelines, and multimodal ML platforms on AWS Bedrock. Skilled in LLM engineering and AI platform development across the end-to-end ML lifecycle: fine-tuning, LangChain/LangGraph, contextual chunking, knowledge graphs, evaluation frameworks, and cloud-native deployment. Strong systems thinker designing resilient, scalable AI platforms that balance innovation, reliability, and governance. Open to Bangalore and global opportunities.

EXPERIENCE

ML Data Associate II — ML & Agentic AI Engineer

Nov 2024 - Mar 2026

Amazon Web Services (AWS) - Bedrock

Bangalore, India

- Engineered scalable ETL pipelines for multimodal LLM training across text, image, audio, and video on AWS Bedrock, supporting 5+ concurrent enterprise projects with improved reliability.
- Built Agentic AI systems using LangGraph and LangChain, implementing multi-step reasoning agents, tool-calling pipelines, and RAG workflows with contextual chunking and SPARQL-based knowledge graph integration.
- Fine-tuned LLMs (SLMs, LRMs) using PyTorch and TensorFlow, and designed AI quality-assurance frameworks (LLM-as-judge, BLEU, ROUGE, BERTScore) to evaluate accuracy, hallucination, groundedness, and safety at production scale.

HIGHLIGHTS

- Enabled 40% faster data-driven decisions by developing real-time Streamlit dashboards and monitoring tools for pipeline health and model performance, consumed by cross-functional teams.
- Productionized enterprise AI workflows by containerizing solutions with Docker, deploying Flask-based REST APIs, and implementing CI/CD, observability, alerting, and runbooks for enterprise-grade reliability.

Market Research Analyst & Data Analyst

Jul 2023 - Nov 2024

Ayvole

Dehradun, India

- Designed end-to-end data collection and analytics pipelines, aggregating structured datasets from 100+ sources.
- Supported large-scale research analyzing 4,000+ startups across 8 sectors for Outlook Business - Start-Up Outperformers 2023.
- Conducted market research and gap analysis, translating statistical findings into written business recommendations and visual presentations for senior stakeholders.

HIGHLIGHTS

- Drove three new media product launches, directly contributing to a 30% increase in market share across client engagements.

Technical Apprentice — Data & Operations

May 2021 - May 2022

Bharat Petroleum Corporation Limited (BPCL)

Kolkata, India

- Collected, processed, and analyzed operational data while ensuring 100% compliance with industry safety and documentation standards.
- Delivered data-driven recommendations supporting four or more operational departments.

EDUCATION

B.Tech - Electrical & Electronics Engineering

Swami Vivekananda Institute of Science & Technology, Kolkata
Jun 2020 - May 2023
CGPA: 8.4

CERTIFICATIONS

- AWS Educate: Introduction to Cloud 101 - AWS (Credly Verified)
- Summarize & Simplify Information with MS 365 Copilot - Microsoft Learn
- Get Started Building with Power BI - Microsoft Learn
- Data Analysis with Python - freeCodeCamp
- Intermediate SQL - DataCamp
- Introduction to SQL - DataCamp
- Intro to Relational Databases in SQL - DataCamp
- Google Analytics for Beginners - Google Analytics Academy
- AI For India - HCL GUVI
- Google for Education - HCL GUVI
- 2 Years on Kaggle - Kaggle

KEY PROJECTS

Agentic AI & RAG Pipeline System

[AWS Bedrock](#)

Designed and deployed a production-grade multi-agent AI system using LangGraph, integrating contextual-chunking RAG pipelines and SPARQL-based knowledge graphs, with full Dockerization, CI/CD pipelines, monitoring, and observability on AWS.

LLM Fine-Tuning & AI Evaluation Framework

[AWS Bedrock](#)

Developed end-to-end LLM fine-tuning pipelines leveraging PyTorch and TensorFlow, implementing robust offline and online evaluation frameworks (LLM-as-Judge, groundedness, safety, hallucination detection) supported by automated Python dashboards.

Multimodal AI Data Pipeline

[AWS Bedrock](#)

Architected scalable multimodal data ingestion pipelines across text, image, audio, and video to optimize foundation models, complemented by real-time monitoring dashboards tracking pipeline health and model quality metrics.

Zeeshan Pro Agent

[Open Source](#)

ChatGPT-style personal agent workspace on LangGraph and LangChain for hosted LLM workflows: document drafting, checklist tracking, and human-approval gates before external actions. Runs on hosted inference (Groq / Hugging Face) with Qdrant Cloud vector storage - no local GPU required.

[github.com/Zshnreza/zeeshan-pro-agent](#)

RAG Telegram Bot

[Open Source](#) · [Live Demo](#)

Fully local Retrieval-Augmented Generation chatbot answering questions from custom documents with source attribution: Mistral via Ollama, Sentence Transformers embeddings, and FAISS vector search served over the Telegram Bot API - zero API cost.

[Live: t.me/zeeshan_rag_bot](#)

AI Engineer Portfolio

[Full-Stack](#)

This resume's companion site: a cinematic portfolio built with Next.js 15, React 19, TypeScript, Tailwind v4, and Framer Motion - interactive particle systems, a 3D skill sphere, command menu, and full SEO/PWA scaffolding, deployed on Vercel.
